Burnaby, BC

V5J 5B9

Regions Supplied: All of BC

Company Notes:

Everland products mean: no irradiation, no preservatives, no additives, no colourings, no refined sugars, no genetically engineered ingredients, and nutritious foods for healthy and environmentally conscious consumers.

By sourcing high quality organic and natural products, Everland ensures nothing extra needs to be added during processing. Based on current trends and research within the industry, the development of Everland Organic & Natural Products emphasizes quality, taste, health, fun, and convenience. In promoting a healthy life style, all Everland products are vegetarian and a majority are vegan. This means our food production processing facilities omit the use of all animal products, with the exception of honey. Due to concerns for the environment and quality, at Everland we strive to source the ingredients as locally as possible. Everland products are packaged in recycable glass and plastic while keeping the product-to-package ratio high. This not only reduces our carbon footprint but also keeps our foods fresh, healthy, and enjoyable.

Products Available:
