Company Notes:

Two of our challenges in life were how to live lightly on this beautiful blue planet and how to do something worthwhile. Shellfish aquaculture has enabled us to meet these challenges. We have refined our farming methods to be compatible with the environment. We maintain genetic diversity by collecting wild seed, and the oyster rafts act as nursery reefs for a wide range of fish, algae, and invertebrates.

Our oysters and clams feed only on naturally-occurring marine plankton. No chemicals, pesticides, or colouring agents are used in the growing of our shellfish. The blend of growing healthy, top-quality shellfish and living the outdoor marine lifestyle is one we truly enjoy. Our commitment is to provide premium-quality shellfish for your enjoyment; and to do so in a manner that allows future generations the same opportunity.
